Digital Signage Solutions:

Digital Signage is a dynamic content display system used for information or advertising. The message is broadcast over multiple targeted electronic billboards for maximum impact”.

M/s M square Innotech Solutions Pvt. Ltd. works is proud to announce full bright board digital signage system product line. Affordable, easy to use indoor advertising, digital signs, sometimes referred to as electronic signs, are right now available in 32 Inch, with optional network capabilities from us.

Digital signage is growing rapidly and our products have hundreds of applications and to name few, corporate lobbies, Hotel lobbies, Banks, convenient stores, Libraries, Retail applications, Trade shows, Museums, Colleges and Universities, Exhibition centers, Health care units, Hospitals, Diagnostic centers, Airports, Bus stations, Railway stations, Cultural functions, Marriage halls, Corporate Meets, Project Seminars, Public awareness, Product Marketing etc.

We have portable pedestal system and different kind of mounting systems to offer.

All our stand alone digital signs are now shipping with full HD 1080 resolution, commercial grade LCD displays, and with High definition media players. This allows for high resolution JPEG images (1280 x 720) (1280*800), and DVD quality MPEG 2 video files (720 x 480) (1024*768) to be displayed on our system offering a greater level of detail to be displayed.

Applications of digital signage:

1. Public information – news, weather and local (location specific) information, such as fire exits and traveler information
2. Internal information - corporate messages, health & safety, news, etc.

3. Advertising – either related to the location the signage is in or just using the audience reach of the screens for general advertising
4. Brand building – in-store digital signage to promote the brand and build a brand identity
5. Influencing customer behavior – directing customers to different areas, increasing the dwell time on the store premises
6. Enhancing customer experience – applications include the reduction of perceived wait time in restaurant waiting areas, bank queues, etc., as well as recipe demonstrations in food stores
7. Enhancing the environment – with interactive screens (in the floor for example) or with dynamic way finding

I T Infrastructure Solutions:
