Basic Signage Solution

Digital Signage is a cutting-edge technology solution that enables customized information to be disseminated to anyone at anytime via fluid motion video, graphics, sound and text. It is a flexible and powerful way to communicate your message to your audience whether it's a customer, client or colleague. By displaying customized content on a variety of digital displays your audience can experience your message dynamically and interactively. Digital signage provides an innovative way for organizations across a wide variety of industries-including financial services, retail, government, education healthcare, sports, entertainment, gaming and transportation-to improve the customer and end-user experience while strengthening its competitive advantage.

Key Features:

- ➔ Auto cycle paly when power is ON; the machine will continue to play the advertising content, from where it is intermitted due to power-OFF
- ➔ Video Formats - IMP4(AVI:DIVX/XVID), MPG2(DVD:VOB/MPG2), MPEG1 (VCD:DAT/MPG1), WMV, MPG, MKV, DIVX, etc. support all popular video format
- ➔ Audio Format - MP3
- ➔ Image Format - JPG, JPEG, BMP, PNG, GIF...etc.,
- ➔ Support all of the combination of photo, audio, video zoning
- ➔ Support rotation 90/270/180 degree
- ➔ Built-in clock and calendar function, can be choosen to display on the screen
- ➔ Capable of setting scrolling caption and Logo on the screen
- ➔ Real-time player monitoring so you can see the status of all the players on your network
